Methodology Overview

- The index is derived from the constituents of the BSE AllCap. The inclusion of DVRs in the index will result in more than 500 stocks in the index. However, the number of companies in the index remains fixed at 500.
- The following company data points are calculated for each eligible company for Index Construction.
- • Average daily total market capitalization
- • Annualized traded value
- • Trading frequency

All information presented prior to Index launch date is back tested. Back tested performance is not actual performance but is hypothetical. The back-test calculations are based on the same metho dology that was in effect on the index Launch Date. However, when creating back-tested history for certain periods, index methodology rules may be relaxed to capture a large enough universe of securities to simulate the target market that the index is des igned to measure. Relaxation in rules may include but are not limited to changes to Stock inclusion criteria, buffer rules, capping and number of constituents. Past performance of an Index is no indication of future results. The BSE Indices (the "Indices") are published by BSE Index Services Private Limited (BISPL), (formerly Asia Index Pvt. Ltd.) which is a subsidiary Company of BSE Limited (BSE). BSE® and SENSEX® are registered trademarks of BSE. These trademarks have been licensed to BISPL.
